

MUHAMMAD USAMA BIN AKHTAR KHAN

SENIOR FRONTEND ENGINEER

Wah Cantt, Pakistan | +92 305 5772374 | [Email](#) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

Senior Frontend Engineer with 7+ years of experience building production web applications, reusable component systems, and data-heavy interfaces. Strongest in React, Next.js, and TypeScript, with hands-on experience across Vue.js, Astro, Web Components, state/data architecture, accessible UI, REST integration, team mentoring, and published developer tooling.

TECHNICAL SKILLS

Core & Frameworks: TypeScript, JavaScript, React, Next.js, Vue.js, Astro, HTML5, CSS3/SASS

UI & Architecture: Tailwind CSS, shadcn/ui, Radix UI, Material UI, Ant Design, Web Components, SSR/SSG, accessibility

Testing & Delivery: Vitest, Jest, Cypress, Git, GitHub Actions, ESLint, Prettier, Vite, Turbopack, Rollup

State & APIs: TanStack Query, SWR, Redux, Zustand, Axios, REST APIs, Firebase/Firestore

Forms & Validation: React Hook Form, Formik, Yup, Zod

Additional: Canvas API, virtualization, drag-and-drop, npm libraries, Rust, Python, Flask, OpenCV

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Victoria Plum

Jul 2024 - Present

Remote - England

- Lead frontend delivery for Giolindo, a React/Next.js product, mentoring a three-person frontend team and owning component structure, UI quality, code review, and delivery planning.
- Translate product and Figma requirements into reusable TypeScript and Tailwind interfaces while coordinating with product, design, backend, and QA contributors.
- Improve engineering consistency through code reviews, linting, formatting, pre-commit checks, and maintainable component patterns.
- Built frontend features for Climate+, a Magento 2.4.8 e-commerce platform using Hyvä, React, GraphQL, and Figma-driven UI implementation.
- Led frontend architecture and delivery for an HRMS platform using React 18, TypeScript, Vite, Zustand, shadcn/ui, and Tailwind CSS, defining reusable component patterns, role-based access control, protected routing, API standards, multi-step employee workflows, and code-quality practices.
- Building Herd WMS as a full-stack engineer using NestJS, PostgreSQL, Redis, React, TypeScript, Prisma, WebSockets, Docker Compose, and NetSuite integrations, including native inventory management and purchase-order workflows for real-time warehouse operations.

Frontend Developer | Next Order

Jul 2023 - Jul 2024

Remote - Australia

- Built a React/TypeScript control panel for restaurant operations, covering menus, vouchers, staff reports, inventory analytics, voided items, service charges, and store controls.
- Created reusable dashboards, tables, forms, filters, and modals; integrated REST APIs using Axios, SWR, and React Query for complex data-heavy workflows.
- Worked across reporting, inventory, staff management, service charges, and analytics features in a fast-moving remote product team.

Frontend Developer | Emumba

Sep 2020 - Jun 2023

Islamabad, Pakistan

- Shipped fintech, fleet-tracking, analytics, and crypto-tax interfaces using React, Next.js, TypeScript, Redux, Formik, React Query, Material UI, and Ant Design.
- Delivered responsive Figma implementations, complex forms, charts, tables, reusable components, refactoring, and frontend architecture improvements.
- Collaborated with designers and backend engineers across fintech, analytics, and GPS-based products while improving usability and code quality.

Frontend Developer | TheTekSol

Oct 2018 - Sep 2020

Remote - Pakistan

- Developed a production review-management system for final-year projects and MS/PhD thesis evaluations at COMSATS University using Laravel views, JavaScript, jQuery, Bootstrap, HTML, and CSS.

SELECTED OPEN-SOURCE WORK

[shadcn-virtualized-tree](#) - **React/TypeScript library:** Headless and virtualized tree supporting large datasets, tri-state selection, keyboard/ARIA behavior, drag-and-drop, theming, tests, and npm distribution.

[viewer-360](#) - **Cross-framework Web Component:** Canvas-based 360-degree product viewer with zoom, image preloading, high-resolution swaps, and wrappers for React, Vue, and Angular.

[git-auto-commit](#) - **Rust developer CLI:** Generates commit messages from staged Git changes using a local Ollama model, presents the result for confirmation, and executes the commit through a typed command-line workflow.

ENGINEERING FOCUS

Component architecture | Design-system implementation | Data-heavy dashboards | Accessible UI | API integration | Frontend mentoring

EDUCATION

BS Software Engineering - COMSATS University Islamabad, Wah Campus | 2016 - 2020
